

Dear valued customer,

Turnitin completed its acquisition of PlagScan by Ouriginal in November and we're very excited to announce that we're now part of the larger Turnitin family. This enables us to adapt faster to change, keep pace with evolving academic integrity needs, and develop solutions that will best suit your needs.

Bigger company, more choices

As part of the Turnitin family, you will benefit from Turnitin's enhanced plagiarism detection capabilities that include text-matching against an unparalleled content database:

- Over **90 billion** web pages
- **82 million** published works
- **1.4 billion** student papers

Turnitin's proprietary web crawler has been indexing the internet for 15 years and updates 102 million links and adds 22 million new pages every day. Thus, keeping our database up to date at all times and ensuring it includes everything that your students may have found and used.

In addition, Turnitin has a broad portfolio of products that includes integrity as well as assessment solutions such as:

- **Similarity** - a comprehensive plagiarism detection solution that protects against copy/paste plagiarism, student collusion, and research misconduct.
- **Originality** - the new standard in academic integrity. It takes best-in-class similarity checking further and applies our expertise to tackle emerging challenges in academic integrity such as contract cheating, code similarity, text spinners, and mosaic plagiarism tools.
- **Gradescope** - a leading assessment and feedback platform that modernizes the grading process and transforms grading into learning.

and many more...

Looking ahead

We now have even more resources to provide you with the best product and customer experience as a joint company. As we go along, we will share status updates at regular intervals. You do not need to take any action or make any changes at this time.

In the meanwhile, if you have any questions, your current sales managers and support teams will be happy to hear from you. Please don't hesitate to contact them directly or through support@plagscan.com.

Best regards,

PlagScan by Ouriginal
